

## Play It Forward.

### “MILLION ACTS OF KINDNESS” TOKEN

**PlayItForward (PFWD)©** is a decentralized digital token created by creators for creators. PlayItForward is used as a digital token to support those who create positive and meaningful content, or simply anyone who deserves a helping hand in achieving a greater good, for the benefit of their communities.

#### MISSION

- PlayItForward Token was founded by an entrepreneur, as a social experiment; not with the intention of trading for quick profits. It was created as **the token needed to exist**. PlayItForward's main intention is to be seen as a “Million Acts Of Kindness” Token.

- **PlayItForward** enables millions of micro-transactions targeting the right cause, potentially magnifying the impact in a positive way.

#### TOKEN PROPERTIES

- **PlayItForward** is released with an initial value of about \$0.01 per token, with a fixed supply of **1,000,000 tokens** guaranteed through its source code, making it a deflationary token.

- **PlayItForward** is a **decentralized** token, as it is secured by millions of computers worldwide on the Ethereum network. It can be used to store value due to its limited supply, making its upside unlimited. It can also be transferred in tiny fractional amounts, making it a great vehicle for **micro-transactions**.

#### HOW IT WORKS?

Open-source developers can add a digital wallet (public key) to their GitHub page, and people from all around the world can support them by anonymously sending them PlayItForward (PFWD) tokens. They in turn can convert the PFWD token to fiat currencies (cash) and spend it.

#### DISCLOSURE

By owning **PlayItForward** Tokens, you acknowledge and agree that PlayItForward Tokens are not securities nor investment contracts. You also agree to hold the team harmless and not liable for any losses or taxes you may incur. Please note that PlayItForward is a community-driven DeFi Ecosystem and not a registered digital currency, so please always make sure that you are in compliance with your local laws and regulations before you make any transaction. Digital tokens are not legal tender and not investments. The crypto market is highly risky and speculative in nature.
