

Play It Forward.

“MILLION ACTS OF KINDNESS” TOKEN

PayItForward (PFWD)© is a decentralized digital token created by developers for developers. PlayItForward is used as a digital token to support open-source projects. It can also be used to support those who create positive and meaningful content, or simply anyone who deserves a helping-hand in achieving a greater good, for the benefit of their communities.

MISSION

- PlayItForward Token was founded by an entrepreneur software architect (aka AvidCoder), as a social experiment; not with the intention of trading for quick profits. It was created as **the token needed to exist**.
- **PlayItForward's** main intention is to be seen as a “Million Acts Of Kindness” Token.
- **PlayItForward** enables millions of micro-transactions targeting the right cause, potentially magnifying the impact in a positive way.

TOKEN PROPERTIES

- **PlayItForward** is pegged to USDC at a minimum value of \$0.01 USDC per token, with a fixed supply of **1,000,000 tokens**.
- **PlayItForward's** initial total market cap is **\$10,000 USDC**. This is to guarantee the minimum value, and to deter token manipulation.
- **PlayItForward's** source code guarantees no more tokens can ever be created, making it a deflationary token by nature. PlayItForward is pegged to USDC with the starting value of \$0.01 USDC and its value can only increase over time due to possible scarcity.
- **PlayItForward** is a **decentralized** token, as it is secured by millions of computers worldwide on the Ethereum network. It can be used to store value due to its limited supply, making its upside unlimited. It can also be transferred in tiny fractional amounts, making it a great vehicle for **micro-transactions**.

DISCLOSURE

By owning **PlayItForward** Tokens, you acknowledge and agree that PlayItForward Tokens are not securities nor investment contracts. You also agree to hold the team harmless and not liable for any losses or taxes you may incur. Please note that PlayItForward is a community driven DeFi Ecosystem and not a registered digital currency, so please always make sure that you are in compliance with your local laws and regulations before you make any transaction. Digital tokens are not legal tender and not investments. Crypto market is highly risky and speculative in nature.
